

# Steel Security Gates

Security gates are TaylorMade to suit any type of opening or aperture, whether it is internal or external.

The security gates are a simple way of protecting and securing any building whether it is fixed permanently removable or hinged into place outer frame work or secure fixing to concrete brick or block wall.

British made from: 40mm x 40mm or 25mm x 25mm box section fully welded for maximum strength.

Also available are steel round bars 15mm or 20mm for extra strength.

Removable gates have side locking points to secure into position.

Window gates can be hinged with bullet secure hinges fully welded for maximum strength.

All security gates can be colour coded to suit your buildings colour scheme or requirements.

Colour coating: galvanised, powder coated, or sprayed finish to withstand and help protect against corrosion when placed in the out elements
